1. (a) A Ltd is a manufacturer of readymade garments. It sells its products to franchisees located across the country. Readymade garment industry is subject to change in trends of fashion and as such, some of the goods are returned and A Ltd accepts them back as sales returns. On the basis of past trends such returns are estimated to be at 20% of the sales of any year. For the financial year 2011-12, A Ltd had accounted for the actual sales return made upto 31st March 2012 but has not reversed the possible expected return that are likely to happen after 31st March 2012, in respect of the sale made for the FY 11-12. Mr. X the auditor of A Ltd wants this to be considered in the accounts for the year ended on 31st March 2012 but the company is of the opinion that although there is a probability of some goods being returned by the franchisees, there is no significant uncertainty regarding the amount of consideration that will be derived from the sale of goods, since the goods are not in the possession of the company and risk and rewards of ownership still lie with the franchisees and the company cannot record sales returns in its books of account in respect of goods that are likely to be received after the date of balance sheet.
